Regarding the Sale of Emission Reduction Credits, (ERCs)

The District regularly receives inquiries from parties that are looking to purchase ERCs. In order to help potential buyers of ERCs, the District publishes a report listing the owners of ERCs who have indicated that they are willing to be contacted regarding the sale of their credits. Please indicate below if you are interested or are not interested in being listed in this report as a potential seller of emission reduction credits.

- ☐ YES, I would like to be listed in the District report of ERC owners.
☐ NO, I do not want to be contacted regarding the sale of ERCs.

Requirements for a complete application

In order to avoid delays in processing this application all emission banking applications should include the following information. Please note that not all emission reductions can qualify for emission reduction credits. Please pay particular attention to the regulations cited below in order to avoid the denial of your request. All rules and regulations and data forms cited below can be found on the District's website at baaqmd.gov.

- ☐ A completed P- 401 data form, (this form).
- ☐ A filing fee and an initial fee for each source for which emission reduction credits are being requested, (Regulation 3-311). Contact your assigned plant engineer for help in determining the correct application fees, or submit no fees and you will be invoiced by the District.
- ☐ Measurements and/or calculations before and after reductions are achieved, including a discussion of the calculation and/or measurement methods. Per Regulation 2-4-202, emission reductions shall be based on the 12 consecutive month period of operation of the source immediately prior to its removal from service or of its modification resulting in emission reductions. If a different period of time is requested, as allowed by Per Regulation 2-4-202, please explain why the alternate period of time used is more representative of the actual emission reductions from the source.
- ☐ Documentation, (operating logs, material purchase records), to establish that the parameters used are accurate and representative of actual emission reductions and to establish that the application has been submitted in a timely manner in accordance with the requirements of Regulation 2-4-402.1.
- ☐ It is the responsibility of the applicant to demonstrate that emission reductions from a shutdown source will not result in a similar increase of emissions at other sources in the District because of a continued demand for the product or service. (Regulation 2-4-303.2)

IMPORTANT: Under the California Public Records Act, all information in your permit application will be considered a matter of public record and may be disclosed to a third party. If you wish to keep certain items separate as specified in Regulation 2, Rule 1, Section 202.7, please complete the following steps:

- (a) Make a copy of any page containing confidential information with the confidential information blanked out. Label this page "Public Copy."
- (b) Label the original page "Confidential." Circle all confidential items on the page.
- (c) Prepare a written justification for the confidentiality of each confidential item. Append this to the confidential copy.

Date:

Emission Reductions, (tons/yr), reported by source

| Source No. | Description | Effective Date ¹ | PM _{>10μ} | PM ₁₀ | POC | NOx | SO ₂ | CO | NPOC |
|------------|-------------|-----------------------------|-----------------------|------------------|-----|-----|-----------------|----|------|
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |

1. The effective date of the emission reduction is the date the source was removed from service or the date that the emissions were permanently reduced from the source's previous level of emissions.
